MBBS+MD (Doctor of Medicine) USA

With or without MCAT in ATLANTA

HIGHER STUDIES, IMMIGRATION & SETTLEMENT (USA & CANADA)

Students from USA, Canada and other countries who wish to pursue a Doctorate of medicine (MBBS+MD) in USA after completing 12th grade can enroll in Atlanta State University for a two year, (90 credits) Pre-medicine program. After completion of premed, with or without MCAT, they can do Pre-clinical studies (2 years) also along with one of the Bachelor programs in State University in Atlanta. After completion of Pre-clinical and Bachelor program from State University, students can enter in 2 year Clinical rotation along with class room based special classes for USMLE 1, II, III. Based on Clinical Rotation and USMLE, students will be selected for matching program (US Residency) Junior doctor and completing Doctorate of Medicine in USA (USMD). Scholarship and loan are also available. If for some reason students not finish the USMD, since they have a four year degree program, they can continue the Master program in any other field.

Since students and parents do not have clear knowledge of how the Medical Education system works, 80% of them study in out side USA and waste money and academic career. If you have MBBS or MD degrees from any university APEX INTERNATIONAL can arrange to study (Doctorate of medicine (USMD) in Atlanta Medical Center. USMD is recognized by Medical Councils all across the world (including MCI). They can practice medicine without any other exams.

Those who study or completed MBBS, MD courses in China, Russia or other European countries, this USMD program in Atlanta, is a great blessing. Also students those who struggle financially and face other difficulties can transfer to Atlanta. APEX INTERNATIONAL can do all arrangements for **Medical Admission; Pre Medical; Pre Clinical; Clinical Rotation; ICM; Hands on Training; Observationship; Core & elective rotation; Recommendation; class room based special USMLE I, II, III training, University Transfer Program etc.**

HIGHER STUDIES, IMMIGRATION AND SETTLEMENT IN USA, CANADA & EUROPE

Students with 12 grade onwards to pay only the first semester fees; then work part time and study for MBBS+ MD; Engineering; Paramedical; Nursing; IT Bachelor, master etc. in USA, Canada & Europe. Then they can apply for Work Permit, PR Residency and Citizenship also.

Most of students do not know they can study in Poland, with less expense and higher standard than India, without IELTS or other English tests. These courses are recognized by European Union; So they may be easy to settle in Europe and also easy for USA or Canada Visa. It may seem unbelievable that the initial expense for MBBS+MD program is \$20000 and \$6000 for other courses. A lack of knowledge that students can complete their education in foreign countries without incurring much expense, they loose opportunities to study and settle abroad. In most cases, they have to study the same courses again, that they completed in their homeland.

APEX INTERNATIONAL has vast experience in this field and has helped thousands of people in the past.
